

## Starfleet Presidio-class

Heavy Starbase; Commissioned: 2363

### Hull Data

Structure: 55 [191 space][0 space remains]  
 Size/Decks: 11/235  
 Height/Diameter: 1,196/1,000 m  
 Complement: 2,000 + 7,000 civilians

### Tactical Data

Phasers: Type XII (x6/E) [-36]  
 Penetration: 7/7/6/0/0  
 Torpedo Launchers: Mk 95 DF (x4/E) [-28]  
 Photon Penetration: 7/7/7/7/7  
 Deflector Shield: FSQ (D) [-13]  
 Protection/Threshold: 17/4

### Docking Data

Docking Bays: 8 [-16]  
 Shuttlecraft: 88 size worth  
 Docking Ports: 3 [-6]  
 Docked Starships: 9 size worth (Size 5 max.)  
 Docking Pylons/Berths: 4 [-20]  
 Docked Starships: 20 size worth (Size 11 max.)

### Operational Data

Cargo Units: 110 [0]  
 Life Support: Class 4 (E) [-9]  
 Operations System: Class 4 (E) [-9]  
 Sensor System: Class S4 (0/+1/+2/+3/+4/E) [-8]  
 Power System: Class 4 (E) [-14]  
 Sublight Drive: No [0]  
 Orbital Correctors: ST-A (0) [-12]  
 Engineering Facilities: Class 5 (+5) [-13]  
 Separation System: No [0]  
 Tractor Beams: 1 u, 1 m, 1 d [-2]  
 Transporters: 5 standard, 5 emergency, 5 cargo [0]

### Miscellaneous Data

Maneuver Modifiers: +5C, -8H, +5T  
 Traits: Hangarbay [-5]

## Mission

The primary mission of the Presidio is to secure high-value areas of the Federation through defense and the construction and repair of new starships.

By the mid-24<sup>th</sup> century, many of Starfleet's older Regula-type stations were being slowly replaced with the much larger and more powerful Spacedock-type stations. Given the size and cost of producing the Spacedock-type stations, the Presidio-class was developed

## Features

The Presidio is armed with multiple type XII phaser arrays and powerful Mk 95 DF torpedo launchers. These launchers are capable of firing quantum torpedoes, but the stations are typically only armed with photon torpedoes. With its powerful FSQ deflector shield grid, the starbase can withstand a great degree of punishment before its shields collapse.

as a modern replacement of the older Regula-type stations that spanned the width and breadth of Federation territory. The first Presidio-class stations were built in orbit of Mars, helping to further secure one of the Federation's most valuable fleetyards. Subsequent stations were built in the outer territories of the Federation, to help defend against threats from beyond, such as the Typhon Pact, while simultaneously allowing the Federation border fleets with ready access to top-notch repair and construction facilities.

The Presidio is a well-armed station designed to secure sensitive areas of the Federation. It has a modest amount of docking facilities for medium and large starships and an extensive amount of docking for smaller starships, such as the Ju'Day-class, of which it can easily accommodate over two dozen.

## Background

### Ships in Service

<u>Name</u>	<u>Registry</u>	<u>Notes</u>
Presidio	Presidio 1	Lead station of the line, constructed in orbit of Mars (2363).
Deep Space Nine (II)	Presidio 33	Constructed near the former location of the original Deep Space Nine (2383).
