Mission

The Suurok-class is primarily a science ship, though like many Vulcan ships of the 22nd century, it also doubles as a combat cruiser.

Background

The Suurok is a staple of the 22nd century Vulcan fleet, and fulfills multiple roles in that organization.

The combat vessel variant was developed as a result of Vulcan contact with aggressor species inimical to Vulcan logic, such as the Andorians and Klingons. Logic dictated that such

species would only respond to the careful and logical application of force.

Features

The Suurok features the typical Vulcan circular ring-shaped warp drive, capable of achieving speeds of warp 6 and beyond. The science vessel possesses adequate weaponry for its era, and a robust deflector shield grid, and more importantly for its designation, a prototype sensor grid.

The combat variant features the typical Vulcan circular ring-shaped warp drive, capable of achieving speeds of up to warp 7, among the fastest of ships in the 22nd century. In addition to its great speed, the combat cruiser possesses science vessel's state-of-the-art sensors and an increased weapons payload.
